DuraBagger™

DB-100

Adapted for Urban Settings

Many large cities have strict regulations concerning the usage of dumpsters. Some, like New York City, prohibit them entirely. For these situations, the DuraBagger™ DB-100 is a perfect solution.

After compaction, the DB-100 directly deposits waste into continuous, tubular bags, all set to be removed and put out for pickup. Despite modifying the base functionality to accommodate big-city environments, the DB-100 retains the quiet operation, simple controls, and expert engineering of our other compactor models.

The DuraBagger compactor is subject to our continuous improvement program, and we reserve the right to implement changes and improvements to the products shown herein without prior notice.
